Dear Interested Parties:

The BLM Tuscarora Field Office has made Final Determinations on the level of attainment of the Northeastern Great Basin Standards and Guidelines, and has prepared an Environmental Assessment (EA) analyzing the renewal of the livestock grazing permit and other various management actions for the Wilson Mountain Allotment.

Enclosed is a "Notice of Field Manager's Proposed Decision for Grazing Permit Renewal on the Wilson Mountain Allotment (No. 01035)." Also enclosed is a copy of the Final Determinations regarding attainment of the Northeastern Great Basin Standards and Guidelines for the Wilson Mountain Allotment.

A signed Finding of No Significant Impact (FONSI) is enclosed which has concluded that management actions, as described and analyzed in the **EA # DOI-BLM-NV-E020-2013-0027-EA**, will not significantly affect the quality of the human environment. Therefore, preparation of an Environmental Impact Statement (EIS) is not required prior to my issuance of the decision.

The EA, FONSI, and Final Determinations on the Standards and Guidelines documents stated above will be available for review on the web. To review these documents go to the following website: http://www.blm.gov/nv/st/en/fo/elko_field_office/blm_programs/grazing/wilson_mtn_allotment.html

The documents are also available upon request at the Tuscarora Field Office.

If you have any questions concerning the subject matter, please contact Casey Addy, Rangeland Management Specialist, at (775) 753-0202.

Sincerely,
/s/

Richard E. Adams
Field Manager
Tuscarora Field Office

Enclosures: As stated
